About Me

Dedicated and hard-working Senior Software Engineer with expertise in scalable software solutions, agile methodologies, and microservice architectures. Committed to delivering high-quality, unit-tested code while ensuring efficiency and innovation.

Professional Experience

Cygnet Infotech Pvt Ltd | Sr. Software Engineer
Sept 2021 – Present

Key responsibilities:
- Worked on the DivideBuy project, a Buy Now, Pay Later solution, enabling customers to purchase products from retailers and pay in smaller installments.
- Developed and maintained a microservice architecture in a TDD environment, ensuring scalability and performance.
- Followed agile methodologies, participated in sprint-based development, conducted code reviews, and delivered unit-tested solutions.
- Integrated Opayo AVS/3DS features, third-party tools, and NetSuite APIs, enhancing payment processing and ledger functionalities.
- Led live migration efforts, resolved critical issues, and optimized cron jobs for improved system performance.
- Led junior developers, reviewed their code, and provided guidance on improvements and best practices.
- Actively participated in scrum meetings, sprint planning, and suggested process improvements to enhance development efficiency.

Zignuts Technolab Pvt Ltd | Sr. Web Developer
Apr 2017 – Sept 2021

Key responsibilities:
- Develop and optimize web applications, including database design and modeling.
- Collaborate with cross-functional teams to ensure project progress and feature integration.
- Work with Laravel, Vue.js, Nuxt.js, and WordPress, implementing authentication, APIs, and cloud solutions.
- Deploy and manage applications on AWS (EC2, S3, RDS, Lambda) and containerize projects using Docker.

Watsar Infotech Pvt Ltd | PHP Developer
Dec 2016 – Apr 2017

Key responsibilities:
- Built REST APIs and admin panels using Yii Framework, integrating CRUD modules with Gii.

Tops Technologies Pvt Ltd | Jr. Web Developer
Jan 2016 – Dec 2016

Key responsibilities:
- Worked as both a Trainer and Developer, developing an HMVC-based admin panel using CodeIgniter.
